

# WOODFOLD

## ASSEMBLING A FACTORY INTERMEDIATE ROLLING POST

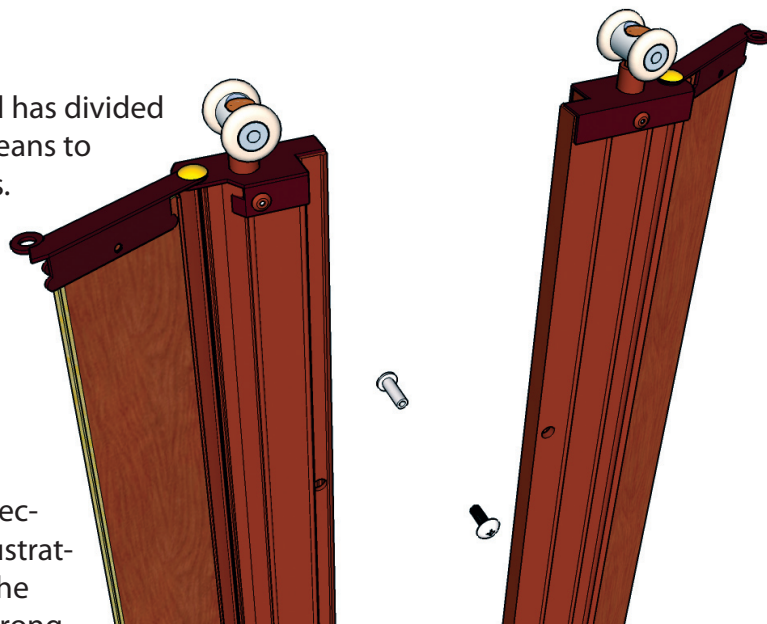

DOOR SERIES: 240, 440, 540, 640, 740 AND 2100

BULLETIN B6-080829

Doors may be heavy! For ease of handling Woodfold has divided the door into convenient sections and provided a means to connect the sections with Intermediate Rolling Posts.

Before installing the door, look over its sections and understand their order. It is frustrating to have all the door sections up on the tracks, only to discover they are in the wrong order or flipped end for end. If you have questions call Customer Service at Woodfold Mfg., Inc.

Once the door sections are hung, slide the halves of the Rolling post together and secure with the provided posts and screws.
